

DRONES FOR FIRST RESPONDERS

This 32-hour course prepares participants to establish or enhance a UAS program and prepare them to sit for the FAA Part 107 remote pilot exam. In addition to 24 hours of lecture, students also receive 8 hours of hands-on flight experience, conducting obstacle courses and practical scenarios. Every student receives a textbook with access to free practice tests

Topics discussed:

- Establishing Drone Team & SOP's
- Airspace & Sectional Charts
- Public Safety exceptions & best practices
- Public Safety Case Studies & Analysis
- Hands-on flight time running scenarios
- Drone Laws and Regulations for your state
